

Harvest Operations Corp. is a diverse energy company, based out of Calgary, offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets. Harvest is committed to protecting the health and well-being of our people, the public and the environment through every decision and action taken each day.

Harvest is currently looking for a Drilling Engineer to join our team in Calgary. Reporting to the Development Manager, the successful incumbent will be responsible for designing, preparing and planning well drilling programs and AFEs according to Harvest Operations Corp. requirements and in compliance with government regulations and guidelines.

Key Responsibilities:

- Develop, implement and maintain drilling programs;
- Reviews and approves well plans for drilling operations done by drilling consulting party;
- Assists in the creation of recommended operating procedures, guidelines and best practice documents for asset drilling, pad and multi-well pad operations;
- Generates drilling project AFEs
- Implement strategies to improve current drilling plans;
- Responsible for managing correct procedures and maintaining a high degree of safety during drilling;
- Recommend and apply new technology in drilling;
- Analyze and make recommendations for drilling problems;
- Achieve production objectives by contributing and making recommendations to strategic plans involving drilling;
- Ensure department activities are in compliance with Harvest policies and government regulations;
- Perform and assume other duties and responsibilities as may be required at the direction of the drilling manager;
- Other duties may apply.

Qualifications

- Required Bachelor's Degree in Petroleum, Mechanical, Chemical, or related engineering discipline.
- 7 years of industry experience with an E&P
- Field experience would be an asset
- Must have advanced knowledge of horizontal/multi-lateral wellbore design
- Advanced understanding of wellbore stability and its impact on casing design.
- Subject matter expertise in cementing and performance drilling required.
- Strong verbal and written communication skills with experience communicating in individual and group settings to multidisciplinary professionals
- Demonstrated ability to work productively in a team environment, both supporting other team members and contributing to the effectiveness and reliability of the team.
- Demonstrated commitment to behavioral based safety programs and ensuring incident and injury free working conditions.

Harvest Operations Corp. provides competitive compensation and a comprehensive benefit package including both short term and long term incentive plans. Please visit Harvest's website at www.harvestenergy.ca to learn more about our company.
