

Harvest Operations Corp. is a diverse energy company, based out of Calgary, offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets. Harvest is committed to protecting the health and well-being of our people, the public and the environment through every decision and action taken each day.

Harvest has an immediate opening for a **Manager, Operations Engineering** in Calgary. The Manager, Operations Engineering, will report to the Chief Operating Officer, Oil Sands, and will be accountable for the integrity & optimization of the BlackGold plant and well facilities. The Manager, Operations Engineering, will oversee the facilities engineering, process optimization, operational improvements, process integrity, and support the Operations team in day to day activities of BlackGold.

Key Responsibilities:

- Accountable for Process Safety & Integrity of the surface production systems, including the physical pressure envelope, operating limits, control & safety automated systems.
- Develop & optimize business processes related to asset improvements (MOC) & integrity.
- Support operating team in clarity & optimization of operating budget, reporting and management.
- Responsible to steward compliance to all regulatory approval and codes.
- Develop & steward an asset optimization plan including innovation, risk management, well operations & capital improvements.
- Mentor direct reports and lead the employee development plans for the BG Operations Engineering team.
- Establish a performance framework to promote accountability, focus, support for key value drivers in oil sands.
- Implement an effective change management process; assuring process safety & portfolio effectiveness.

Qualifications:

- Minimum 10-15 years progressive Oil & Gas industry experience, preferably in SAGD.
- A strong entrepreneurial leader with broad business knowledge to drive value creation.
- Well rounded oil sands experience including production, facilities or process engineering, project commissioning, start-up and operations support roles.
- Experience in managing industrial plant processes, optimization, process safety & integrity.
- Professional Engineer (ideally industrial, chemical, mechanical or process) and Professional designation with APEGA.
- Experience working collaboratively with design engineering, drilling operations, drilling performance, budgeting, subsurface development, geoscience, production & reservoir management.
- Effective written & verbal communication skills.

Harvest Operations Corp. provides competitive compensation and a comprehensive benefit package including both short term and long term incentive plans. We are committed to providing ongoing professional development and opportunities for career advancement. Please visit Harvest's website at www.harvestenergy.ca to learn more about our company.
